

NOTES AND PASSWORD MANAGER

TEAM - 49

INTRODUCTION

Note taking is a very good habit to organize our daily life. This is an online android application which helps to take notes at anytime and helps to generate a very strong password for your account security and makes the same available whenever you need. Basically it's a two-in-one app

OBJECTIVE

The main objective of our project is to create an android application which helps to take notes at any time and helps to generate a very strong password for security of your account and makes them available whenever you need. It's going to have two major functionalities at the same time. Password managing & note taking are one of the most overlooked virtual activities in today's digital age.

CONCLUSION

This project's core objective was to create a user-friendly, secure, and feature-rich solution for effectively managing passwords and notes while prioritizing data security and user convenience
